

Z85/Z120

Capsule Filling Machine

General Description:

Z85 maximum output 85,000capsules/h,Z120 maximum output 120,000 capsules/h. Z85,Z120 series capsule filling machine can be installed 3 dosing stations, in order to realize the combined dosing of various products within the same capsule.

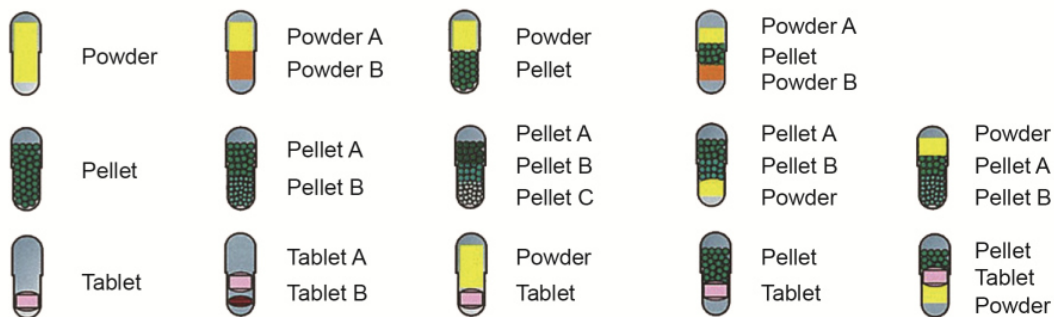

Z85 series offer the maximum versatility of combined filling. Except standard dosing combination, according to the request, customized dosing combination is available.

Details:

Z85 Series Capsule Filling Machine is designed for hard gelatin capsule drug filling available with a variety of different models. Thanks to its versatility, flexibility, reliability & accuracy so that is widely used in all kinds of drugs filling and offer the maximum versatility in combined dosing of various products within the same capsule.

Through Parameter adjustment and special dosing unit, realize the production speed and dosing accuracy the best combination. Minimum encumbrance, compact size; Separation between production and mechanical area to minimize the surfaces in contact with the product; User-friendly, no skilled operator required.

Combined Dosing:

| Technical Specifications | Z85 | Z120 |
|------------------------------|--------------------------------------|---------|
| Maximum output(capsules/H) | 85,000 | 120,000 |
| Number of capsules per cycle | 11 | 19 |
| Capsule sizes | OL-5 | |
| Maximum installed power(Kw) | 14 | |
| Standard voltage | 230-400V 50-60Hz | |
| Aspiration | 5,100 L/MIN 3,200mm H ₂ O | |
| Compressed air(l/min) | 100-6bar | |
| Vacuum | 100-20mbar | |
| Weight(Kg) | 1,400 | |
| Closed size(L*W*H mm) | 960*1279*1928 | |
| Opened size(L*W*H mm) | 2650*2650*1928 | |
